2021/2022 Special Offer ... Non-trophy hunt

As a result of good rains and ideal circumstances during the last years, the numbers of some game species such as blue- and black Wildebeest have increased. It is in this light that we offer you to take part in the management of these numbers.

The emphasis during a non-trophy hunt shifts from taking the trophy back home to the experience of the hunt itself, the possibility to take photos and to hunt larger numbers of game against very affordable prices. Due to legal requirements no trophies from these non-trophy hunts may be exported, otherwise we would jeopardize our own trophy hunting operations. Non-trophy hunt can be very well combined with some days of trophy hunt of other species. However if a hunter chooses to take the one or the other trophy, we will also apply for a trophy permit and the trophy will be charged according to the current trophy pricelist. Please specify that already with your booking.

The hunting takes place under fair chase conditions. The PH will guide the hunter and will point out to him old female and /or inferior male animals; this means that the management hunt is conducted on a selective basis complying fully with the norms of sustainable utilisation. This gives full meaning to our mission statement that hunting is applied conservation.

The non-trophy hunt is preferred on a 2:1 or 4:2 basis.
